Instagram

YouTube

Facebook

= 100 million

Platform	Brief description	Year founded	Active users in 2022	Strengths	Weaknesses	Role in GI practice
Twitter	Text-based microblogging platform with limited photo and video sharing capability	2006	217 million	<ul style="list-style-type: none"> • Ease of use, brevity • Most medical professionals, societies, journals 	<ul style="list-style-type: none"> • Only 240 characters per tweet • Limited reach outside professional circles 	<ul style="list-style-type: none"> • Networking within among GI community • Accessing info from societies, journals
Facebook	Multimodal social networking platform with photo and video sharing, and e-commerce. Now under parent company, Meta.	2004	2.91 billion	<ul style="list-style-type: none"> • Historically largest platform with greatest reach • Accommodates multiple formats (photo, video, etc) • Allows for business profiles 	<ul style="list-style-type: none"> • Highly convoluted platform • Unfavorable public opinion 	<ul style="list-style-type: none"> • Marketing GI practice with business page • Direct communication with established patients
Instagram	Formerly photo-based sharing platform, now focused on video. Also under parent company, Meta.	2010, acquired by Facebook in 2012	1.48 billion	<ul style="list-style-type: none"> • Instagram “Stories” feature is highlight of platform • Image/video based • Now integrated with Facebook 	<ul style="list-style-type: none"> • Increasingly convoluted platform • Image/video based 	<ul style="list-style-type: none"> • Marketing GI practice or individual physician to patients • Sharing moments throughout the day
YouTube	Online video-based sharing platform.	2005, acquired by Google in 2006.	2.56 billion	<ul style="list-style-type: none"> • Best platform for long-form video • Content easily searchable • Integration with Google search engine • Content can be monetized 	<ul style="list-style-type: none"> • Highest barrier to entry and time consuming • Requires proficiency in filming, editing 	<ul style="list-style-type: none"> • Best for long-form video explanations or public education, especially if proficient in video production
TikTok	Short-form video-based social platform that gained rapid popularity between 2019-2021.	2016 (as Douyin); 2017 (outside China)	1 billion	<ul style="list-style-type: none"> • Fastest growing major platform • Interface allows for unparalleled reach • Interface now mimicked by YouTube and Instagram 	<ul style="list-style-type: none"> • Requires comfort with appearing on camera and storytelling ability 	<ul style="list-style-type: none"> • Short form video for general audiences (rather than local marketing)
LinkedIn	Business and employment-oriented social networking platform	2003	810 million	<ul style="list-style-type: none"> • Highly professional and credible with visible credentials • Best platform for job recruitment 	<ul style="list-style-type: none"> • Limited reach for public education and medical professionals 	<ul style="list-style-type: none"> • Best for staff recruitment • Best for showcasing credentials and professional achievements

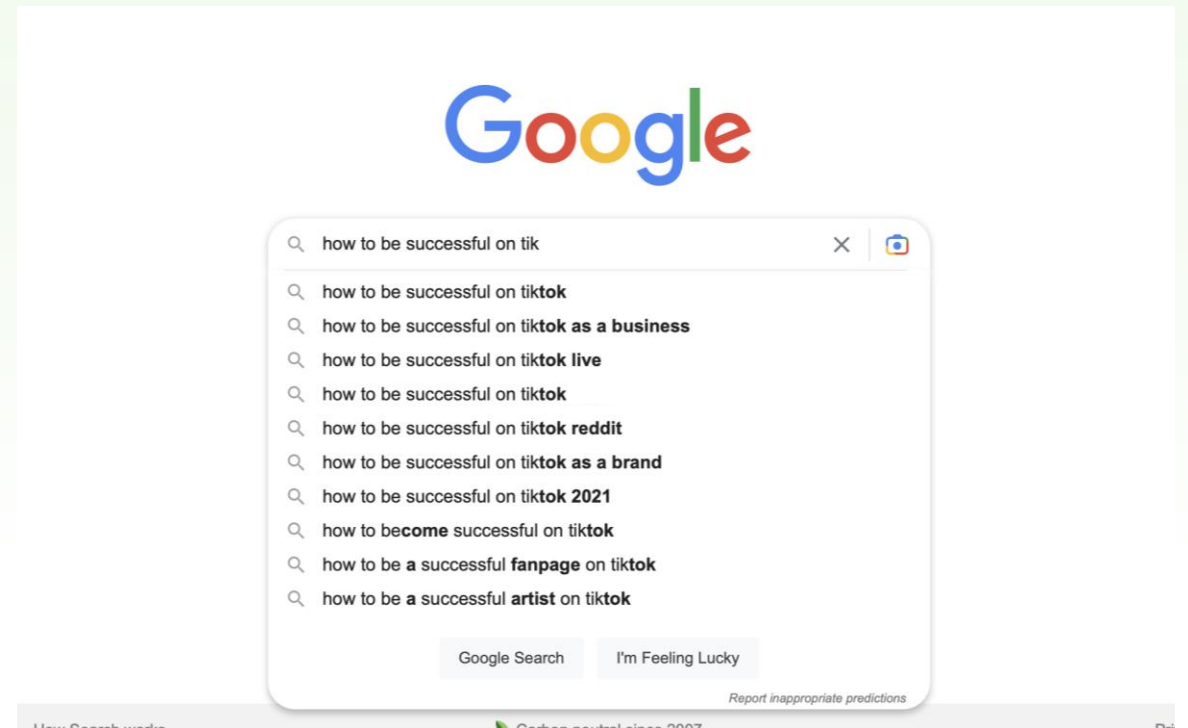

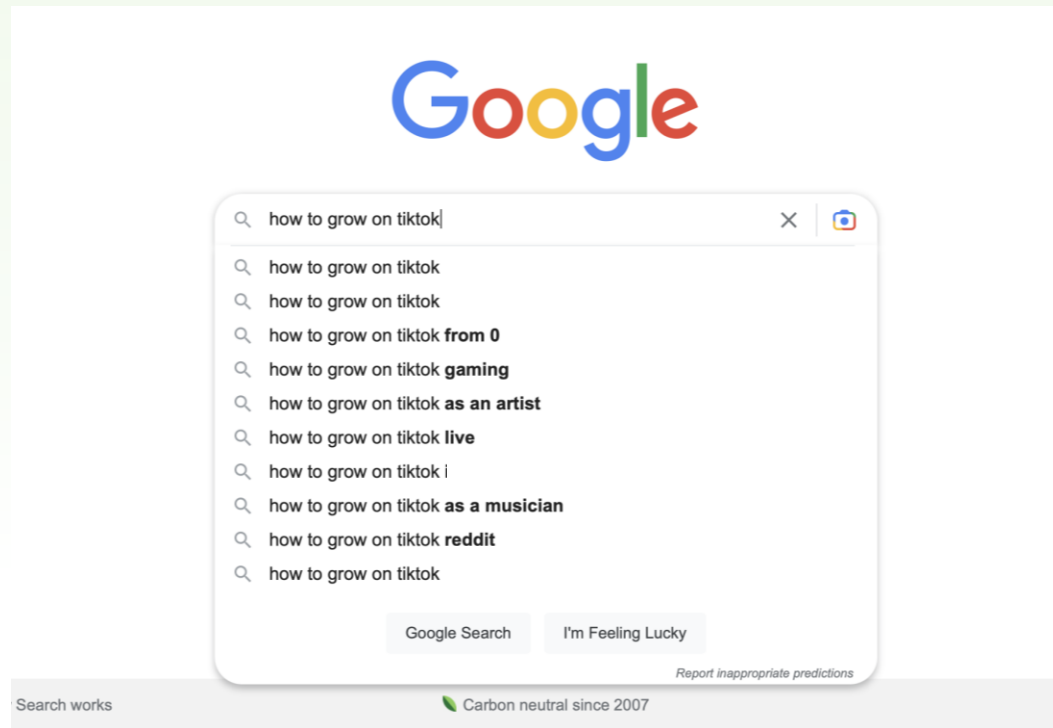

Chiang AL. Gastrointest Endosc Clin N Am. 2021

Navigating social media as a health professional

- There has been a growing presence of health professionals using social media
- Social media allows us to connect with a larger community, educate, and dispel medical misinformation
- Marketing tactics and social media training are not included in a medical school curriculum

My social media journey...

- Started in March 2021 during my research month
- Navigating social media: where to start?
 - Google, “social media growth coach”, TikTok scrolling

How it started...

How it started...

- Created and posted colorectal cancer awareness videos
- Also posted on other social media platforms

.. but I wasn't growing on social media

- “Algorithm” is always changing
 - What are the “trending” audios?
 - What content does my audience want?
 - Current trends?
- Adaptability and flexibility are important

#guthealth - 3.4B views

#ibs = 2.1B views

#guttok – 775.3M views

#gerd – 677.3M views

#coloncancer – 280M views

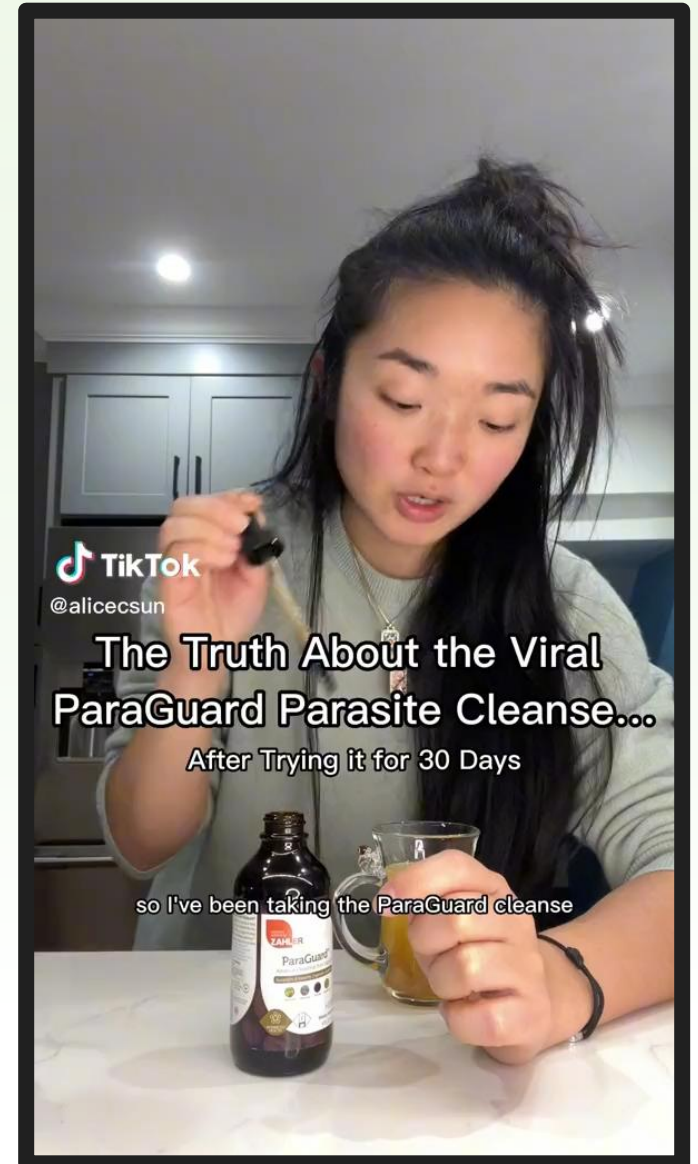

#Guthealthtrends

- Bone Broth
- Coconut oil
- Juice cleanse – “to flush out 8-10 lbs of stool”
- Lymphatic drainage
- Gut health supplements

#Guthealthtrends

- Parasite cleanse
- L-glutamine
- Drinking olive oil - 3 M views and 300K 'likes'
- Internal shower - chia seed water

Gastroenterologists,
gastroenterology APPs, registered
dietitians

gut health scientists, holistic health
practitioners, holistic nutritionists, gut health
coaches, influencers

Steps to social media success

Step 1: Create an account

Step 2: Identify your goals and purpose

- Patient education and dispelling misinformation
- Elevating recognition
- “Humanizing” medicine
- Professional education/networking
- Raise medical awareness

Step 3: Know your strengths and weaknesses

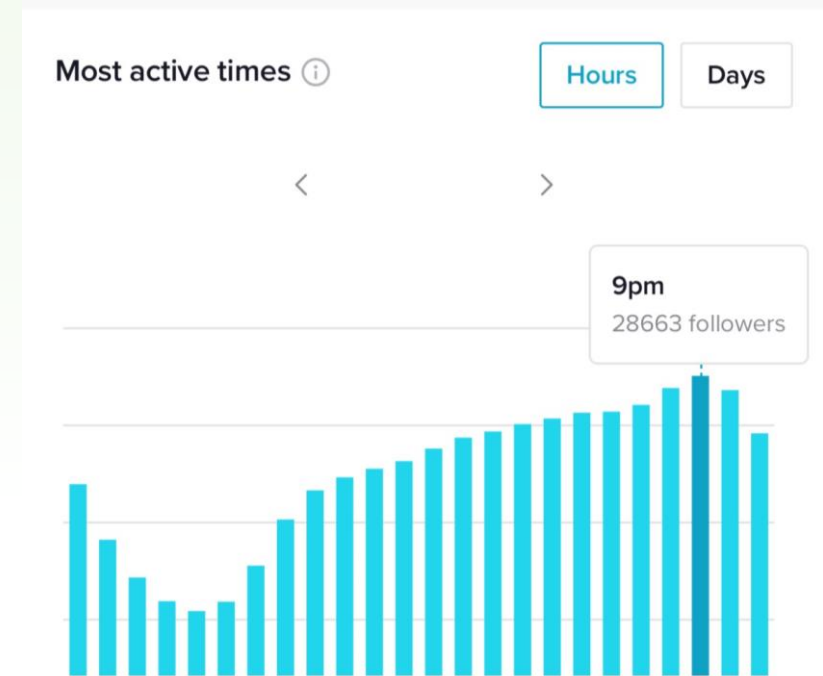

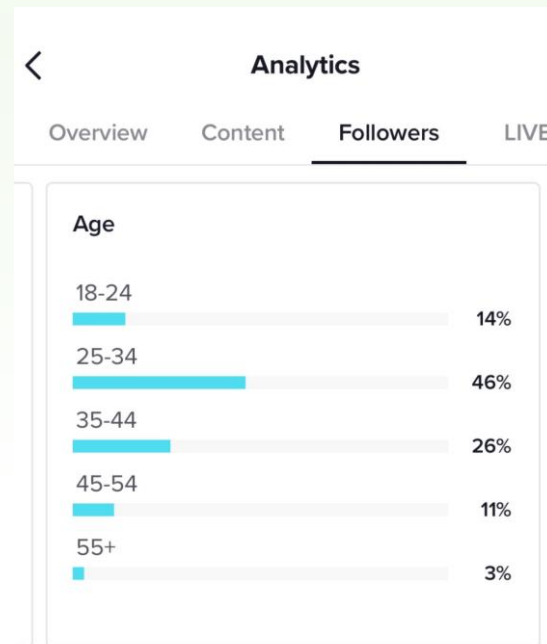

Steps to social media success

Step 4: Understand your target audience

Step 5: Familiarize yourself with the trends

Step 6: Post and engage your audience

Step 7: Have fun and be consistent!

How it's going...

Dr. Karissa L., MD
