

Neil Shah, MD

Dr. Shah is Associate Professor of Medicine at UNC Chapel Hill. He has been in North Carolina since elementary school, growing up in Charlotte, NC. He earned his BS in Biomedical Engineering at NC State University (Go Pack!) before completing his medical school degree at UNC School of Medicine. He then completed his Internal Medicine Residency at University of Virginia in Charlottesville, VA and returned to UNC Chapel Hill for his Gastroenterology fellowship. He finally finished his training by completing his Transplant Hepatology year at Vanderbilt University. He joined UNC faculty in 2018. He currently serves as Associate Medical Director of Liver Transplantation and Program Director for the Transplant Hepatology Fellowship.

Outside of the hospital he enjoys spending time with his wife and two children (Sonia and Nolan). He also enjoys traveling, spending time outdoors and trying to beat his personal bests for bike rides in the Triangle. Dr. Shah stated, "I really have appreciated everything NCSG provided for me as a fellow as well as the opportunity to collaborate and connect with the gastroenterology community of NC to help bring higher standards of care to our great population. I hope to continue these relationships and help develop and promote educational opportunities for our amazing providers in our society."
