

Patrick Green

Dr. Green was born in upstate NY, but raised in FL. He has largely toured ACC schools in his academic career including earning his Bachelor's degree in biology at Florida State University followed by a Master's degree in Developmental Biology at the University of Tulsa. He then worked in stem cell research in the bone marrow transplant unit at Duke University for several years before attending medical school at UNC Chapel Hill. He stayed in the ACC to do his residency, a chief year, and GI fellowship at the University of Miami before accepting the faculty position at Wake Forest university . He is currently an assistant professor of medicine at Atrium Health Wake Forest Baptist Medical Center where he specializes in the treatment of Inflammatory Bowel Disease and serves as the director of the GI Fellowship Program. He is married and has three children in middle school and high school.

Dr. Green has valued the connections he has made through the NC Society for Gastroenterology and feels that participation in the society allows gastroenterologists opportunities to share knowledge and best practices from all settings, private and academic, allowing us all the opportunity to take the best care of GI patients across the state.
